EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-10, 26-52.

This application is in condition for allowance except for the presence of claims 1-10, 26-52 directed to an invention non-elected without traverse. Accordingly, claims 1-10, 26-52 have been cancelled.

The following is an examiner's statement of reasons for allowance:

A method of distributing optical power, wherein the optical power is redistributed based on output monitor signal that indicates defect in at least one optical power source, is known and common in the art. Some of the exemplary prior art were cited in the prior office action. However, none of the prior art fairly teaches or suggests such method further comprising, inter alia, a step of retrieving a **priority signal** that is associated with a **priority ranking** for various optical devices connected in the optical distribution system, and a step of determining the **change** in such priority ranking and **re-distributing** the optical power based on such determination, in the manner claimed in the instant application.

Art Unit: 2874

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
